Lead iOS Engineer with 10+ years on Apple platforms (iOS, macOS). Built and led mobile teams (up to 4 engineers), drove architecture across Healthcare, FinTech and Social domains. Full-stack capable (React, Next.js, PostgreSQL).

## Experience

### Senior iOS Engineer | Lead Engineer

Dec 2023 — Oct 2025

Finite Timespace LLC

Provide hands-on engineering and technical consulting for businesses and startups, focusing on Apple platforms – iOS, macOS, watchOS, tvOS.

- Wurthy: Developed a business web app (boosting sales and enabling monthly recurring revenue) and a customer web app (flexible checkout flow for buyers). Built products using **Next.js, React 19, Tailwind, PostgreSQL (Supabase), Prisma ORM**.
- Loblaw Digital: Designed and delivered a **new subscription system** for in-store physical products, allowing users to manage recurring orders automatically (no need to reorder manually).
- Loblaw Digital: Championed the introduction of a **UseCase** domain layer within the iOS architecture, improving testability for the entire iOS eng team.

### Founding iOS Engineer

Jan 2023 – Oct 2023

Wurthy (Profitable solutions for growing businesses)

- Built and delivered the MVP iOS app delivering a new C2C Buy-Now-Pay-Later experience. Designed architecture (MVVM+Coordinator) and managed a team of 3 iOS engineers.
- Sunset the iOS product after company pivot to B2B category, driving transition planning and team realignment.

### Senior iOS Engineer

Jan 2020 – Apr 2022

Life360 Inc. (Family safety through location sharing)

- Managed a **team of 4 mobile developers (Android and iOS)**, tackling requirements processing, delivery responsibilities and people management.
- Designed and led the Lead Generation feature to provide **personalized auto insurance plans** for customers (*30+ million MAU, end of Q1 2022*).
- Developed user's driving experience workflow, created brand new *Driving* tab to see driving statistics and promote safe driving. Technologies included Swift, UIKit, RxSwift, Uber RIBs, XCTest.

### iOS Software Engineer

Nov 2018 – Dec 2019

BetterMe USA (Personalized holistic wellness solution)

- Build the Health Coaching and Mental Health apps from scratch using **Redux architecture**.
- Migrated the Mental Health app from VIPER to Redux architecture.

### iOS Software Engineer

Oct 2015 – Sep 2018

CyberVision, Inc.

Project: Nuvo: applications for pregnant women and doctor.

- Developed iOS applications for manufactured FDA cleared device for remote nonstress tests for pregnant women to monitor real-time health indicators.
- Architected and developed a separate SDK to deal with device via Bluetooth Classic. Supported FDA and MFi device certification from engineering side.
- The application was designed to scale in mind using VIPER design pattern and BDD testing approach (Quick, Nimble).

## Technical Stack

**iOS:** Swift, Objective-C, SwiftUI, UIKit, Swift Concurrency, Swift Testing, RxSwift, GCD, XCTest, Redux, MVVM.

**Full-stack:** React, Next.js, TypeScript, PostgreSQL.

**Tools:** Make, Fastlane, GitHub Actions.

## Education

### Master's Degree in Computer Science

2017–2018

Igor Sikorsky Kyiv Polytechnic Institute, Biomedical Engineering Department
